

MIKE RANDALL DESIGN

## About the Designer

Mike Randall is a Red Seal endorsed designer maker who is proudly based in Victoria, British Columbia. A master of wood bending, Mike combines complex traditional craft with contemporary and minimalist forms, resulting in refined pieces that spark wonder and joy in both residential homes and commercial spaces.

Mike is a settler, grateful to be a guest living and working on the traditional, ancestral and unceded lands of the Songhees, Esquimalt (Ləkʷəŋən) and WSÁNEĆ peoples.

# Bow Lamp

The Bow Lamp is a meticulously hand-crafted minimalist floor lamp and one of Mike's most iconic designs. It features a double-tapered bent hardwood 'Bow' fitting seamlessly into its curved white oak base and is made using traditional joinery and wood bending techniques. Its 'smart home' compatible lighting system takes the Bow Light from practical task lighting to functional art with the touch of a button.

## S-Light

The S-Light is a modern piece of functional art and Mike's most distinctive linear pendant design. Using the same tapers as the Bow Lamp, the asymmetrical form of the S-Light is perfect for hanging over a bar, kitchen island or dining table and adds a unique minimalist statement to the space.

# SiteLines

SiteLines is a modern, clean-lined modular lighting system designed for both private residences and public spaces. By using multiples of these curved linear pendants in different groupings, patterns, and sizes, designers and architects can customize their installations to be in keeping with their design vision for any given space.

two50

The highly versatile two50 Light is a simple, minimalist fixture that was designed for both mass installations or singularly over a nightstand or wash station. This makes the two50 ideal for both private residences and large public spaces.

# PURE 9ty

The PURE 9ty wall sconce uses highly sustainable OLEDs and is the latest innovation to come out of Mike Randall Design.

In its simplest form, PURE 9ty comes in up, down or up/down versions. All are available in the standard, non-dimmable, retrofit and in a 'new build' fully dimmable format that is compatible with a variety of automated home systems.

This technology opens up new custom sconce options for the interior designer and architect. Please connect with Mike or the retail partner staff for more information on custom work.

# Petala

The uniquely delicate profile of Petala is sculpted to a form derived from the tulip petal. With a wide range of customizable LED options, Petala is an ideal choice for the kitchen, dining room or hotel reception.

# Beam

Beam was born out of requests from designers for a simple, fully customizable linear pendant that could be tailored to the needs of the client. Beam is available in the four standard sizes of 4', 6' and 8' and can be customized up to 12', contrasting ends are standard.

The Linea Series Wall Wash Lights are designed to provide creative lighting options for the space. This fully customizable series comes in single pendants, cluster pendants, wall sconce and floor lamp models and are suitable for any room.

# Linea Series

## Wall Wash

# Linea Series Up / Down Pendant

Matching the profile and style of the Wall Wash Lights, the beauty and simplicity of this linear pendant provide exceptional lighting in the most minimal form possible. Ideal for residential kitchens and dining rooms or in the hospitality industry, this light comes in a wide variety of customizable formats.

# Custom Design

Mike also specializes in custom lighting, sculpture and furniture, designed specifically for the client's needs. Please connect with the retail partner staff or contact Mike directly for more information.

At Mike Randall Design, sustainability principles are fundamental. Mike only uses North American hardwoods (Eastern Maple, Ash, White Oak, Red Oak and Black Walnut) and all the finishes and glues meet his strict "Home Friendly" criteria. In addition, all the electronic components are fully serviceable, extending their life well past that expected of the electronics.

#### Certification & Installation:

While all of Mike's lighting is only certified for use in Canada all the components used are UL / ETL certified.

All hardwired installations should be done by a qualified electrician.

#### Finish Options:

Ash

Black Walnut

Natural  
White Oak

Ebonized
